

EXTENDOSPHERES XOL 200 - WHITE MICROFILLERS

XOL 200 is a comparatively new unique super-light filler, which consists of small stony glass microspheres. XOL 200 is greatly superior in many areas compared to other fillers - also economical - as the XOL 200 gives 8-10 times bigger volume for the same weight. XOL 200 gives You a freely flow and an easy stirring into e.g. polyester, as the microspheres are round and NOT inorganically fillers in fragments. XOL 200 is treated with silan for optimal addition to e.g. polyester.

XOL200 can be used as light weight extender in:

- Gelcoat
- Polyester
- Epoxy
- Paint
- Concrete
- Asphalt
- Glue
- Polyurethan
- Colors
- Compositeer
- Insulating material etc.

XOL 200 is being delivered in sacks of 9 kg.

Properties	Standards	Unit	Value
Density	-	g/cm ³	0,24
Specifiv weight - bulk	-	g/cm ³	0,10-0,12
Particle diameter	-	my	100
Soften point	-	oC	1800
Chemical composition	Standards	Unit	Value
Aluminosilicate	-	% of weight	100
