

## Woven Roving Fabrics (0°/90°)

ALL INFORMATION BELOW WAS PROVIDED BY COMPOSITES ONE LLC

### Description

Woven Roving Fabrics are composed of direct rovings woven into a fabric. The ECR input rovings are designed to give controlled wet-out and excellent laminate properties. The Construction gives bi-directional (0°/90°) reinforcement and the strength of continuous filaments. Woven Roving Fabrics are designed to be compatible with multiple resin systems.

### Product Offering

Family	Product Description	Total Weight (oz/yd <sup>2</sup> )	Weight Uniformity		Standard Width (in)
			0°	90°	
WR	C1 WR24	24	13	11	10/25/38/50/60

#### Note:

The present notice deals in general information. It is necessary for the user to check beforehand the compatibility to the materials and working techniques. Our products are of constant and superior quality and cannot be blamed for discrepancies due to their use or reaction, which are of the exclusive responsibility of the user.
